· INDEX VOLUME 36 ·

1991 and the institutions (letter) 233
A.H. Reeves — the man and the engineer by K.W.H. Cattermole 383
Aircraft, the all-electric by M.J.J. Cronin 309
AI?, clever computers — why should engineers use by P. Chung and R. Inder 189
Ada for Euro Fighter 125
All-electric flying boat (letter) 377
Allen, P.H.G.: Solar ponds (letter) 415
Amorton 245
ASA integrates ASIC design 362
ASIC design in the real world — deep water by M.A. James 263
Assembly Design 366
Australia's electricity beyond 2020 by A. Frost 347
Awards, Toshiba invention 91

Ballistic electrons promise new path in chips 4
Battilana, J.A.: Paying your way (letter) 48
BBC on time 88
BBC Radio 2 (letter) 338
Bell, D.A.: European research (letter) 304
Bell, G.W.: Space limits (letter) 233
BEW again!, phew, it's 82
Biggs, S.: Salary Survey (letter) 178
Black gold, electricity and, the wealth of the desert by S. Jumah 197
Blind, leading the sighted 167
Box, wot, no? 206
Bradley, J., and Fielding, G.: (see Fielding) 117
Breaking with test tradition 242
Bright Sparc by R. Dettmer 331
Broadcast engineering by C. Woods 250
Broadcast engineering (letter) 376
Broadcasting with megawatt power, international AM, — speaking unto nations by J. Wood 237
BT entertains grand ideas 122
Bus architecture, future-proof 127
Bush telegraph — pilot rural radio network in Sierra Leone by S.A.G. Chandler 51
BYPS produces Rabbit from the telepoint hat 162

Cableless calls, providing (letter) 153
CADCAM 'is failing to deliver' 244
CAD initiative, the UK electronics, — hands-on education by P.L. Jones, R.E. Massara and T.I. Pritchard 213
CAD, UK firms 'underuse' 6
CAE added to Visula Plus 91
CASE for better software, the 246
Cattermole, K.W.H.: A.H. Reeves — the man and the engineer 383
Chandler, S.A.G.: Bush telegraph — pilot rural radio network in Sierra Leone 51
Chatterjee, A.: Electricity in the Third World (letter) 48
Chaubal, K.V.: Energy in India 75
CHP, local warming for 287
CHP plant, Minister opens first factory 164
Chung, P., and Inder, R.: Clever computers — why should engineers use AI? 189
CISC learns from RISC 42
Clarke, A.J.: Whatever happened to ISDN? (letter) 415
Clarke, G.G.: Ducking the issue (letter) 304
Coal-fired generation, new, 'needed in 5 years' 322
Codec, a Celp speech — the big squeeze by R. Dettmer 55
Common language, a (letters) 178, 233, 254, 305
Comms are looking up (letter) 377
Comms, wide-area 122
Component industry, figures show sharp upturn in 282
Computing into the 90s — a long way from the abacus by R. Dettmer 67
Copsey, R.B.C.: Typing units (letter) 101
Cornwall, cableless calls across 42
Cronin, M.J.J.: The all-electric aircraft 309
Crosstalk 10, 11, 136, 137
CT2 enters first US trials 285
Cunningham, D., and Watson, G.: (see Watson) 131
Current, watch the 84
Currie, H.: False zeros (letter) 255

Dand, P.: Applying pressure 63
Data life (letter) 304
Data mover 408
Davies, M.G.: A new circuit theorem? (letter) 8
Decommissioning Soviet nuclear plants by V.A.E. Fountain 102
Deep-space probe awakens 167
Dekker, W.: Japan's success in electronics — a challenge for Europe beyond 1992 223
Dell, H.: Stereo sound (letter) 254
Design faster on screen 127
Desmond, K.: Electric boats — whence and where to now? 210
Dettmer, R.: A long way from the abacus — computing into the 90s 67
Dettmer, R.: Bright Sparc 331
Dettmer, R.: Electricity's conductor 343
Dettmer, R.: Great expectations — the HI transputer 411
Dettmer, R.: Revolutionary energy — a wind/diesel generator with flywheel storage 149
Dettmer, R.: The big squeeze — a Celp speed codec 55
Dettmer, R.: User-programmable logic — chasing the gate array 181
Dettmer, R.: Which Computer? and Communications '90 208
Dettmer, R.: X windows — the great integrator 219
Developing technology by T. Prins 24
Dick, A.L.: Power on amateur-radio HF bands (letter) 338
Digital signals, regularity allows invisible mending for 127
Dinwiddy, S.E.: Whatever happened to ISDN? (letter) 415
Dish aerial 44
Drax 362
Drive-in ATMs (letter) 101
DRS Model 95 from ICL 282
DSO with A4 footprint 206
DSO with eight channels 6
DSP, it's all done by 408
DTI puts its money on parallelism 44
Ducking the issue (letter) 304
Dunkley, B.: Engineers open windows 114

East, new market in, for enterprising Westerners 206
Edsac, design decisions on — computers before silicon by M.V. Wilkes 429
Electrex thriving after 40 years 35
Electrex and Power Plant to come together 35
Electric boats — whence and where to now? by K. Desmond 210
Electric cars, Finns power ahead in 362
Electricity in the Third World (letter) 48
Electricity's conductor by R. Dettmer 343
Electricity's conductor (letters) 414
Electronica 90, people and displays feature on show at 322
Electronic nose, on the scent of the, — the fifth sense by H.V. Shurmer 95
Electronics challenge (letter) 304
Elliott, J.: Neighbourhood Engineers 417
Ellory, F.R.: More radar history (letter) 8
EMC Directive, the European — setting the standards by G.A. Jackson 143
EMI shielding, high stakes for 125
Engineering *Endeavour* by M. Williamson 425
Engineers open windows by B. Dunkley 114
Enterprising Australian finds power in his creek 242
Europe, the engineer in by J.C. Levy 15
European Report by G. Roberts 7, 72, 93, 138, 170, 218, 248, 306, 336, 410
European research (letter) 304
Europe open for business by Lord Trefgarne 267
Europe's new trade partner 282
Eutelsat II deployed, first 326
Evans, J.: *Review* reviewed (letter) 376
Expectations rise in semi-conductor industry 164
Extended family 404

Falling costs (letter) 255
False zeros (letter) 255
Fax, getting more out of 206
FDDI and beyond, a network for the 90s by G. Watson and D. Cunningham 131
Felling the groves by J.C. West 185
Ferranti buyouts 125
Ferriday, N.: Electricity's condutor (letter) 414
Fibre optics for audiophiles 122
Fielding, G., and Bradley, J.: Local generation — the devolution of power 117
First wireless manufacture (letter) 178
Flat displays, market for, gains momentum 370
Flinty path to better Fortran 202
Floods 88
Foetal heartbeats 4
Forth Bridge 365
Fountain, V.A.E.: Decommissioning Soviet nuclear plants 102
Frost, A.: Australia's electricity beyond 2020 347
Frost, A.: Green energy? (letter) 100
Fumanchu and PingPong, look out for 202

Gardner, P.A.E.: Common language (letter) 255
Gas works on Teesside 404
Gelbstein, E.: Common language (letter) 254
Generation, local, the devolution of power by G. Fielding and J. Bradley 117
Gibson, A.D.: Data life (letter) 304
Gigaflops appear in PCs 47
Gledhill, S.J.: Life in the fast lane — advanced fabrication techniques for a microwave spectrum analyser 395
Glow-wire test for fire hazard 205
Go gas 406
GPT prepares for testing time ahead 369
Gray, H.D.: Talking sense (letter) 100
Green energy (letter) 376
Green energy? (letters) 100
Green energy? electricity in the 1990s by D. Lidgate 27
'Greenhouse' emissions from coal, NP plans to reduce 242
Green, K.H.: Broadcast engineering (letter) 376

Half a Cray for £5k 370
Hammond, B.J.: Testing time — advances in logic analysis 103
Hands-on education — the UK electronics CAD initiative by P.L. Jones, R.E. Massara and T.I. Pritchard 213
Harding, R., and White, C.R.: (see White) 155
Harper, J.M.: Get the act together (Crosstalk) 11
Helps, F.G.: Itaipu — the rock that sings 252
Hilo4 406
Hockmeyer, I.O.: All-electric flying boat (letter) 377
Holt, P.: Electricty's conductor (letter) 414
Horsnell, R.: Nothing ventured, nothing gained 298
Hubble Space Telescope, the, a new window on the universe by M. Williamson 128
Huddart, K.: Why road pricing will fail (Crosstalk) 10
Hughes business, a, spinning in space by M. Williamson 290
Hungarian telecoms, the future of, — freedom of speech by G. Pronay 271

ICL goes East 284
Image, creating the right by T. Prins 256
Image processing for telecommunications — moving pictures by I. Corbett 257
Image processing on Unix 202
Inder, R., and Chung, P.: (see Chung) 189
India, energy in by K.V. Chaubal 75
In retrospect 66, 106, 146, 273
Intelsat's new generation by C.J. Lilly 111
Investing a million a week, the benefits of 162
Irish eyes are smiling 245
Irish, V.: Personal liability for software copying 94
ISDN via BT, more 325
ISDN, whatever happened to? by P.J. Lewis 357
Islay project gets under way 365
Itaipu — the rock that sings by F.G.Helps 252
IT runs away with billions 162
IT, survey shows top managers unaware of 91

Jackson, G.A.: Setting the standards — the European EMC Directive 143
James, M.A.: Deep water — ASIC design in the real world 263
Japan's success in electronics — a challenge for Europe beyond 1992 by W. Dekker 223
Jeffries, A.E.H.: Drive-in ATMs (letter) 101
Jones, P.L., Massara, R.E., and Pritchard, T.I.: Hands-on education — the UK electronics CAD initiative 213
Jumah, S.: Electricity and black gold — the wealth of the desert 197

Kettlewell, N.I.C.: BBC Radio 2 (letter) 338
Know your own company 246

Learning the business — engineering education for the next decade by A.F. Pollard 31
Lessons for the future — science and technology in the National Curriculum by D.J. Martin 387
Levy, J.C.: 1992 and the institutions (letter) 233
Levy, J.C.: The engineer in Europe 15
Lewis, P.J.: Whatever happened to ISDN? 357
Lidgate, D.: Green energy? electricity in the 1990s 27
Lightning, forecasting father than 167
Lights, bright 244
Lilly, C.J.: Intelsat's new generation 111
Lingard, A.R.: Naval intelligence — knowledge-based decision support for naval command 229
LINK, contrasting views from different sides of 245
LINKs, poly (letter) 305
Linkline, dial 84
Local generation — the devolution of power by G. Fielding and J. Bradley 117
Logic analysis, advances in, — testing time by B.J. Hammond 103
Logic, user-programmable, chasing the gate array by R. Dettmer 181
Lott, A.E.: Stereo sound for TV (letter) 377

Manchester designed, Japanese built 205
Massara, R.E., Pritchard, T.I., and Jones, P.L.: (see Jones) 213
Martin, D.J.: Lessons for the future — science and technology in the National Curriculum 387

· INDEX VOLUME 36 ·

Mayes, V.: SI and the typewriter (letter) 481
Mayes, V.: Typing SI symbols (letter) 255
Meares, D.J.: Stereo sound (letter) 305
Medics, joint project aims at clearer view for 84
Meters, up-to-date 402
Millimetric communications — new frequencies for old by C. Shepherd 421
More radar history (letter) 8

Naval intelligence — knowledge-based decision support for naval command by A.R. Lingard 229
Neighbourhood Engineers by J. Elliott 417
New circuit theorem?, a (letter) 8
Nickson, G.P.: Parliamentary bias? (letter) 153
1992 and the Institutions (letter) 304
Non-ionising radiation 369
Nothing ventured, nothing gained by R. Horsnell 293

Object-oriented approach, the by S. Wilson 277
Object-oriented approach (letter) 338
Ormiston Wire 284
Osprey takes flight 122

Packet video by D. Pearson 315
Painting a brighter picture by R. Thornton 379
Parliamentary bias? (letter) 153
Parliamentary Report by P. Oppenheim MP 72, 92, 135, 169, 209, 249, 296, 337
Parallel innovation 202
Pay for IT 4
Paying your way (letter) 48
PCN battle, licensing opens 6
PCs, speed reading of data for 246
Pearson, D.: Packet video 315
Personal liability for software copying by V. Irish 94
Personal communications — the dream and the reality by G. Vincent 299
Peters, J.H.C.: Green energy? (letter) 100
Pocket, a printer in your 164
Pocket, a workstation in your 164
Pollard, A.F.: Learning the business — engineering education for the next decade 31
Pollution, ocean radar tracks 88
PowerGen meets environmentalists with gas 284
PowerMouse 47
Power on amateur-radio HF bands (letter) 338
Power records 84
Pressnell, R.: A common language (letters) 178, 305
Pressure, applying by P. Dand 63
Price, H.: Radio changes (letter) 414
Prins, T.: Creating the right image 256
Prins, T.: Developing technology 24
Pritchard, T.I., Jones, P.L., and Massara, R.E.: (see Jones) 213
Pronay, G.: Freedom of speech — the future of Hungarian telecoms 271

Quigley, M.J.S.: Electronics challenge (letter) 304

Radio changes (letter) 414
Radio network in Sierra Leone, pilot rural — bush telegraph by S.A.G. Chandler 51
Ramsgate Royal Harbour 325
Recession, who believes in the big, bad? 42
Regulating for efficiency — learning from the USA by A. Warren 372
Riches, G.: Road pricing (letter) 101
Ringing costs 84
Road pricing (crosstalk) 10
Road pricing (letter) 101
Robot 287
Robots strive to compete 'for the glory of sport' 287
Rourke, W.J.: 1992 and the Institutions (letter) 304
Rules, new, announced for generators 82
Rumsey, F.: Hearing both sides — stereo sound for TV in the UK 173

Salary Survey (letter) 178
Satchell, R.: A common language (letter) 233
Scheduling order 42
Schofield, J.R.G.: Short-termism or . . . (letter) 376
Selling ideas 288
SERC sets up industrial unit 288
Sharp practises at Oxford 125
Shepherd, C.: New frequencies for old — millimetric communications 421
Short-termism of . . . (letter) 376
Shurmer, H.V.: The fifth sense — on the scent of the electronic nose 95
SI and the typewriter (letter) 48
Siemens develops 16 Mbit DRAM 325
Signal success 369
Single market, the Institution and the by J.C. Williams 2
Sizewell B 82
Smart research, DTI sponsors 285
Solar ponds (letter) 415
Sony centres on Staines 244
Space insurance — a calculated risk by M. Williamson 139
Space in the 1990s — the promise and the hope by M. Williamson 37
Space limits (letter) 233
Space, spinning in — a Hughes business by M. Williamson 290
Space, the next 40 years in — the pigeon and the eagle by M. Williamson 23
Sparc, lighter shade of 366
Sparcstation 2 404
Speaking unto nations — international AM broadcasting with megawatt power by J. Wood 237
Squirrel cage, the age of the, by B. Wojtas 435
Standards, setting the — the European EMC Directive by G.A. Jackson 143
Steam vehicles remembered (letter) 153
Stereo sound for TV in the UK — hearing both sides by F. Rumsey 173
Stereo sound for TV (letter) 377
Stereo sound (letters) 254, 305
Strivens, D.J.: Steam vehicles remembered (letter) 153
Suntex 402
Superchip, world's first 47
Supergraphics come down to the desktop 366
Swift-Hook, D.T.: Green energy? (letter) 100
Talking sense (letters) 100, 254
Taylor, C.V.: A common language (letter) 233
Taylor, D.I.: Falling costs (letter) 255
Telecom centre, Shropshire home for national 328
Telecom regulations (crosstalk) 11
Telecoms, EC looks at 325
Telecoms industry's future 'bright but hazy' 326
Testing time — advances in logic analysis by B.J. Hammond 103
Testing with extras 365
The fifth sense — on the scent of the electronic nose by H.V. Shurmer 95
The pigeon and the eagle — the next 40 years in space by M. Williamson 23
Thornton, R.: Painting a brighter picture 379
Total Solutions, distributing resources at 406
Train identification, positive-line management by C.R. White and R. Harding 155
Transputer, the HI — great expectations by R. Dettmer 411
Trefgarne, Lord: Europe open for business 267
Two for the price of one — Which Computer? and Communications '90 by R. Dettmer 208
Typing units by R.B.C. Copsey (letter) 101
Typing SI symbols (letter) 255

ULSI brings challenges 206
UltraNet, first, in the UK 328
Ulysses — a space odyssey over the Sun by M. Williamson 378
Unix, standard 44

Vickers, G.H.: Green energy (letter) 376
Vincent, G.: Personal communications — the dream and the reality 299
VME, more megaflops for your 288

Warren, A.: Regulating for efficiency — learning from the USA 372
Watson, G., and Cunningham, D.: FDDI and beyond, a network for the 90s 131
Welbourn, D.B.: Talking sense (letter) 254
West, J.C.: Felling the groves 185
Whatever happened to ISDN? (letters) 415
Which Computer? and Communications '90 by Roger Dettmer 208
Whines, J.: First wireless manufacture (letter) 178
White, C.R., and Harding, R.: Line management — positive train identification 155
Wide spectrum, viewing a 47
Wilkes, M.V.: Computers before silicon — design decisions on Edsac 429
Williams, J.C.: The Institution and the Single Market 2
Williams, K.J.: Poly LINKs (letter) 305
Williamson, M.: Comms are looking up (letter) 377
